2013 Program Effectiveness Data

University of Rio Grande/Rio Grande Community College

Radiologic Technology

As part of the Radiologic Technology Program’s accountability to communities of interest, Rio publishes the following program effectiveness data to ensure program transparency.

Program Statistics

Credentialing Exam Pass Rate

The Joint Review Committee on Education in Radiologic Technologists (JRCERT) defines the credentialing pass rate as the number of graduates who pass the American Registry of Radiologic Technologist credentialing examination on their first attempt compared to the total number of graduates who took the exam. The program’s 5-year average pass rate is 83%. Thirty-five students out of 42 students passed the exam on their first attempt from 2009-2013.

Job Placement Rate

The job placement rate is the number of graduates employed in the radiologic sciences compared to the number of graduates actively seeking employment. This number excludes students who are not seeking employment or are continuing their education. The program’s 5-year average job placement rate is 100%. Twenty-four students out of 24 students reported having found employment within 12 months of graduation.

Annual Program Completion Rate

The annual program completion rate is the number of students who complete the program compared to those who initially enrolled in the program. The 2013 annual program completion rate is 56%. Nine students began the program but only 5 completed it.
