The Associate of Technical Study (ATS) degree is an individually planned technical education program designed to respond to specialized needs. The ATS program is open to any student admitted to the University of Rio Grande/Rio Grande Community College if the Chair of the School of Engineering Technologies determines that an existing technology degree program will not meet the student’s educational goals and that those goals are based on a feasible occupational objective.

The proposed program of study must meet the Ohio Board of Regents requirements for content and must be approved by a committee of School of Technology faculty members, who advise the student as needed throughout the implementation of the program.

Application for an ATS program must be made before 33 semester credit hours of combined transfer and University of Rio Grande/Rio Grande Community College academic coursework have been completed. The remaining courses must include at least half of the special/technical courses of the program.

As the primary objective of the ATS program is to broaden the educational program alternatives in a community that has very limited industrial base, proposed educational objectives may be very unique and nontraditional.
