

VidGrid Cell Phone Recording Instructions for Long Videos. (10+ Minutes)

Before beginning:

- Check that there is enough storage room on your phones to record a longer video.
 - Do a test video recording to see how much will be able to be recorded.
 - To do this open the camera app and choose the video record button, the phone will automatically determine how much time a video can be recorded. (If there isn't at least time, then you must remove some items that are being stored on your phone.)

Iphone Users

VidGrid has sent a link to a video recording outlining on how to accomplish this. Here is the link <https://app.vidgrid.com/view/bmoEJF76ARPB> .

Android Users

- Change the resolution of their video recording and then should follow the normal procedure outlined in the course.
 - From the Camera app, touch **Settings (the gear icon in the camera app)**.
 - Touch **Video size**.
 - Touch any setting that is **below FHD (60 fps)** and this will allow you to record a video that is longer than 10 minutes. *(keep in mind that the video length is still determined by the available storage space on your phone or device.)*

<input type="radio"/>	QHD	2560x1440
<input type="radio"/>	FHD (60 fps)	1920x1080
<input checked="" type="radio"/>	FHD	1920x1080
<input type="radio"/>	18.5:9	2224x1080
<input type="radio"/>	1:1	1440x1440
<input type="radio"/>	HD	1280x720
